

CLAIMS

1. A polyaniline-containing composition, characterized by comprising a polyaniline and an emulsion polymer, wherein the emulsion polymer including a vinylpyrrolidone and an acid group-containing monomer as constituent monomers and as essential components.
2. The polyaniline-containing composition according to claim 1, wherein the content of the vinylpyrrolidone is in the range of 10 to 70 % by mass in the total constituent monomers for the emulsion polymer.
3. The polyaniline-containing composition according to claim 1 or 2, wherein the content of the acid group-containing monomer is in the range of 0.1 to 40 % by mass in the total constituent monomers for the emulsion polymer.
4. The polyaniline-containing composition according to any one of claims 1 to 3, wherein the polyaniline is an emeraldine-type polyaniline.
